Sales of AutoCAD started in 1983 when Autodesk's first CAD application, AutoCAD 1.0, was released. By March 1986, the first dedicated CAD workstation model, the GraphiCAD-2, was introduced by a consortium of vendors led by Autodesk and Radio Shack. The GraphiCAD-2 workstation featured AutoCAD and a 32-bit graphics controller. Over the years, the design concept changed. AutoCAD 2 was released in December 1986 and introduced the ability to work directly in vector graphics and three dimensions (3D). AutoCAD 3 introduced the ability to combine 2D and 3D graphics into one drawing. By 1989, the GraphiCAD-2 workstation was replaced by the GraphiCAD-3, which introduced features including advanced graphics modes, multiple fonts, drafting as a job, improved 64-bit floating point graphics and a software package for AutoCAD. By 1994, Autodesk introduced the first version of the AutoCAD software to work on the Windows platform. This first version of AutoCAD on Windows was released with AutoCAD "Classic", a 3D-style design environment. In 1995, Autodesk introduced AutoCAD "Drafting", a 2D CAD application. In 1997, Autodesk introduced AutoCAD's first Internet-based application, AutoCAD Web. The 1997 release of AutoCAD Web included a Windows 3.x version. The original AutoCAD on Windows was replaced in 1998 by AutoCAD 2000. The new version was compatible with older versions of AutoCAD and included full 64-bit floating point operation. AutoCAD 2002 introduced the ability to work directly in CAD file formats, such as DWF, DXF and other formats. The ability to create and work with CAD files on the Internet was introduced in AutoCAD 2002. In 2004, AutoCAD received a major update with the introduction of AutoCAD 2004, which included Windows Vista compatibility, higher resolution rendering and multiple-core processors. In 2006, Autodesk introduced the fully 64-bit version of AutoCAD. In 2008, Autodesk introduced AutoCAD 2008, which introduced a redesigned user interface (UI), 64-bit floating point operation and Windows 7 compatibility. The release of AutoCAD 2008 was followed by

"I would, first of all, consider that a much more important group to focus on. They shouldn't have entered the country in the first place. They should not have been here. That's the way I look at it," he said. "When you look at it from that standpoint, from the standpoint that you have 10 or 15 or 20 million people who come in illegally, then you start thinking about the real numbers, the real numbers are really far greater than that." The President also said that, "You know it's just common sense, it's common sense." Meanwhile, the Department of Homeland Security is pushing for more funding and resources to deal with the millions of Central American children and families trying to enter the country.Monday, November 6, 2008 A slice of pumpkin and a bit of bacon.... One of my favorite things about the holidays is the food. My mom makes a big turkey with lots of yummy side dishes on Thanksgiving. On Christmas Eve my family and I gather around the kitchen table to watch Christmas movies. We all dress up and go to church and the main event is my dad's big meal. I remember the good old days when we had turkey and dressing and cranberry sauce for Christmas dinner. We are still a big family and that's just how we do it. My mom and I will be preparing those dishes again on Christmas day. This year I decided to try making a little ham
